BIOS living™

IMPORTANT INSTRUCTIONS - DO NOT DESTROY

- Be sure to read the accompanying instruction booklet carefully before using this heated throw.
- **Do not** use this heated throw with an infant or anyone sensitive to heat, such as a person with poor blood circulation.
- **Do not** use over cuts, abrasions, lesions or areas of damaged skin.
- **Do not** tuck in the wired area of this heated throw.
- **Do not** route electrical cords between the mattress and box spring. **Do not** allow the cords to be pinched.
- Keep the controller away from drafty areas that may become damp or wet such as an open window. **Do not** use pins - they may damage the electric wiring.
- Be sure that this heated throw is used on an alternating-current supply circuit of the proper voltage. Turn off or unplug when not in use.
- The product may experience excessive heat in areas where the heated blanket is bunched or folded while in use. Unfold your blanket when excessive heat happens. If the temperature does not come back to normal, please consult the manufacturer or the retailer immediately.
- **Do not** tuck the blanket or supply cord in a sofa or other furniture. All portions of the blanket or controller should be visible at all times.
- Wrapping of cord around the controller may damage the cord. Loop loosely when storing.

- **Do not** use dry-cleaning fluid on this bedding, cleaning solvents may have a deteriorating effect on the insulation of the heating element. **Do not** dry clean.

SET UP PROCEDURES

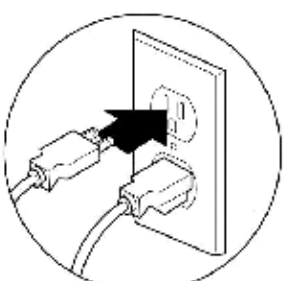

STEP 1

Place controller near the head of the bed. Cord should run from the controller under the bed connecting to the end of the blanket at the foot of the bed.

STEP 2

Connect Power Cord: Connect power cord to the blanket by matching the arrow on the power cord to the arrow on the connector. Once arrows are aligned, push cord into the connector until they are securely connected. You should feel it snap into position.

STEP 3

Plug Controller into the wall: Once you have properly attached power cord to the connector, plug your heated blanket into the wall.

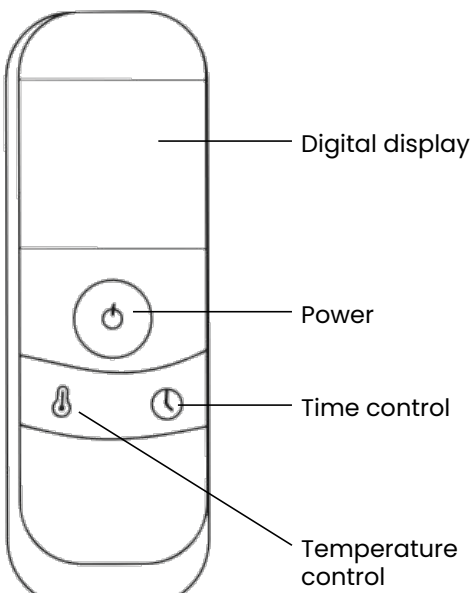

CAUTION:

- **Do not** plug main power cord into the wall outlet until you have completely set up your heated product as per the instructions.
- Disconnect power cord from the wall before detaching controller cord from your heated throw.
- Always make sure cords are not pinched between mattress, bed slats, furniture, wall, or any surface.

- This product has a polarized plug (one plug blade is wider than the other). To reduce the risk of electrical shock, if this plug does not fit in the outlet, reverse the plug. If it still does not fit, contact an electrician.

CONTROLLER FEATURES

CONTROLLERS: Power On/Off, temperature setting and auto-shut off features for controller with the same button.

AUTO SHUT OFF: Each controller will automatically shut off 10 hours after the controller is turned on. This is designed to provide added safety and conserve energy. To reactivate the heating feature simply press the power button. To restart after a power outage simply press the power button.

TO USE

1. Press the middle button to turn on the power. The controller will default to the lowest setting and 8-hour automatic shutdown.
2. The button below and left of the Power button controls the temperature of 1-10 levels, and the button to the right controls the automatic shutdown time of 1, 2, 4, 6 and 8 hours.
3. To turn the controller off, press the Power button until no light is seen on the controller. **Caution:** Always turn

off the heated blanket and disconnect the power cord when not in use.

SAFETY ESSENTIALS

Setting Up

- **NEVER** trap or pinch any of the electrical cords inany way. Make sure the cords are never rested between the mattress and box springs.
- The heated area of the heated throw should always lay flat on top of the mattress to prevent overheating.
- If the plug does not fit into your outlet, contact a qualified electrician.
- Be sure that the power supply is used only on 120V, 60HZ Current Supply.
- Make sure the cord from the controller to your heated product is connected and locked tightly.
- **NEVER** use your heated throw with an airbed, a pullout sofa or mechanically adjusted bed.
- You may use this heated throw with any sheets, mattress pads or other blankets but never in combination with any other heated blankets.
- The warming products should never be folded, balled up or bunched in any way when in use. May result in overheating and/or permanent wrinkling of the fabric.
- **Do not** use with generators, power converters, or inverters.

Care and Maintenance

- Be sure to read carefully the accompanying instruction booklet before using this bedding.
- **Do not** tuck in the wired area of this bedding.
- **NEVER** use pins in and around the warming product – They may damage the electric wiring.

- Cats, dogs and other pets should always be kept away from the product, as a sharp claw may result in damage to the heating element.
- Keep the controls away from drafty areas that may become damp or wet, such as an open window.
- Always turn off and unplug the blanket when not in use, either by turn off the controller or unplugging from the wall outlet.
- Wrapping of the cord around the controls may damage the cord. Loop loosely when storing.
- **NEVER** iron your warming product.
- **NEVER** use dry cleaning fluid on this product. Cleaning solvents may damage the wiring insulation.
- If improper operation of this bedding is observed, discontinue its use immediately and consult the manufacturer or the dealer regarding its repair.
- **Do not** tuck the blanket or supply cord in a sofa or other furniture. All portions of the blanket or controller should be visible at all times.

IMPORTANT INSTRUCTIONS

To operate this heated throw properly and safely, there are some critical safety precautions you need to follow. As with all electrical appliances, there is an inherent danger of overheating, fire or personal injury if the product is not used correctly. Please carefully read what follows before using the warming product.

CARE INSTRUCTIONS

WASHING INSTRUCTIONS

Never dry clean or use bleach. Disconnect all cords before washing.

Do not dry clean the blanket, it may deteriorate the heating element.

MACHINE WASHING

Never submerge cords or control unit. Disconnect all cords before placing blanket into the washing machine. Machine wash in warm water on gentle or delicate cycle.

HAND WASHING

Hand-washing is the best way to clean your heated blanket. Disconnect all cords before washing. Wash your textile separately by hand in a tub of lukewarm (100ºF) water using a small amount of mild laundry soap or detergent. Soak for 5 minutes. Next, gently work the textile up and down for five more minutes. **Never** rub or scrub. **Never** twist. **Do not** use a wringer.

DRYING INSTRUCTIONS

Never use commercial dryers at the laundromat. They may be extra hot and damage the wiring. **Do not** iron. **Do not** plug in until completely dry.

MACHINE DRY

To machine dry, put a dryer on low heat and allow to tumble until dry. Ensure that the textile has enough room to tumble freely. If blanket draws in during washing, while still damp gently stretch until it returns to its original size.

LINE DRY

You can line dry, simply by draping the warming blanket over two parallel clotheslines or a shower rod with the head and foot ends down. Do not reconnect the blanket until it's completely dry. **Do not** use clothespins that can pinch wires.

STORAGE

Store it in a dry place. Allow it to cool down before folding.

QUESTIONS & ANSWERS

Q: The light on my controller does not light up.

A: Assure that all the wire connections are tight and that the power cord is connected to an "energized" socket (try a lamp to verify that the outlet is working properly).

Q: The controller is lit but the blanket does not heat up.

A: Test the product by folding the textile over on itself and turning on the controller. Ensure that controller lamp is lit. After approximately five minutes, carefully feel between the layers. Never leave the product turned on and folded up for more than a few minutes.

Q: I feel some warmth but not a lot. How warm should this blanket get?

A: This blanket will provide enough warmth to keep you quite comfortable even in an extremely cold room with only a light blanket on top. You should spend several nights experimenting with the heat settings until you find your personal comfort level. This blanket is not like a heating pad (this amount of heat would be too hot to use all night long). In normal operation, warming blankets do not feel hot to the touch.

Q: Can I sit or lie on my heated blanket?

A: Just sitting or lying on the blanket will not harm it. Jumping on it or other similar abuse may damage it.

Q: Can I use bedspread or comforter over my heated blanket?

A: You normally will not need more warmth than this blanket will provide. However, you may use any bedding you wish with this blanket except an electric mattress pad, another electric blanket or a heating pad (overheating may occur).

Q: My blanket works fine but then seems to shut off.

A: This kind of blanket has a preset function, which can shut off automatically in 10 hours. Just press the button again, and your blanket will work for another 10 hours until you turn it off. If it doesn't heat for 10 hours but shut off, please check to make sure all connections are tight.

Q: My power supply cord sparked at the wall outlet when I plugged it in.

A: Yes, many electric appliances will sometimes "snap" due to the inrush of electricity when first plugged in. This is completely normal and nothing to be concerned about it.

Q: Why is my controller warm?

A: A small amount of heat is produced when transferring power from the wall to the blanket. This warmth is completely normal and is nothing to be concerned about.

1 YEAR WARRANTY

The Heated Throw has a 1 year warranty to be free of manufacturing defects in materials and workmanship under normal applications, for the original owner. If this product becomes inoperable due to defect, return the product with all components and proof of purchase to the address listed below. This warranty does not cover any shipping/transport costs. This warranty does not apply to normal wear and tear or if the product is subject to misuse, neglect, rough handling or damage.

Ship the unit prepaid and uninsured (at owner's option) to:
